

*Group 2 Support Surface
Micro Air Mattress*

Documentation Required

- ❖ *All Insurance payers*
 - Prescription
 - Medical record notes specifying medical necessity

- ❖ *Medicare recipients*
 - Written Order Prior to Delivery (WOPD), which includes all the following elements:
 - ✓ Start Date
 - ✓ Patient name
 - ✓ Provider name
 - ✓ Detailed description of item(s) prescribed
 - ✓ ICD-10 code(s)
 - ✓ Length of need
 - ✓ Provider signature with credentials (for Medicare recipients)
 - ✓ Provider signature date (in addition to start date of prescription for Medicare recipients)
 - Copy of Care Plan

- ❖ *Medicaid recipients*
 - Prescription or Medicaid Certificate of Medical Necessity (CMN) – may replace prescription

Progress Notes or Care Plan Requirements

- ❖ *Client meets the following criteria*
 - Multiple stage II pressure ulcers located on the trunk or pelvis which have failed to improve over the past month, during which time the beneficiary has been on a comprehensive ulcer treatment program including all the following:
 - Use of an appropriate group 1 support surface
 - Regular assessment by a nurse, physician or another licensed healthcare practitioner
 - Appropriate turning and positioning
 - Appropriate wound care
 - Appropriate management of moisture/incontinence
 - Nutritional assessment and intervention consistent with the overall plan of care
 - Large or multiple stage III or IV pressure ulcer(s) on the trunk or pelvis

 - Myocutaneous flap or skin graft for a pressure ulcer on the trunk or pelvis within the past 60 days, and has been on a group 2 or 3 support surface immediately prior to discharge from a hospital or nursing facility within the past 30 days.

- ❖ *The care plan must contain the above elements*

- ❖ *Continued use of a group 2 support surface is covered*
 - Until the ulcer is healed
 - If healing does not continue, there is documentation in the medical record to show that:
 - Other aspects of the care plan are being modified to promote healing; or
 - the use of the group 2 support surface is reasonable and necessary for wound management
